

FIG. 1 is a perspective view of a device 10, which includes a base 12, a top 14, and a side 16. The base 12 has a front edge 18, a rear edge 20, and a bottom edge 22. The top 14 has a front edge 24, a rear edge 26, and a top edge 28. The side 16 has a front edge 30, a rear edge 32, and a side edge 34. The device 10 includes a plurality of openings 36, 38, 40, and 42, which are located on the front edge 18, the rear edge 20, the bottom edge 22, and the top edge 28, respectively. The device 10 also includes a plurality of features 44, 46, 48, and 50, which are located on the front edge 18, the rear edge 20, the bottom edge 22, and the top edge 28, respectively.

FIG. 1

FIG. 2

FIG. 4 is a cross-sectional view of the device 100 in a closed position. The device 100 includes a housing 120, a plunger 110, a spring 130, and a valve 140. The plunger 110 is biased by the spring 130 to move between an open position and a closed position. The valve 140 is located at the bottom of the plunger 110 and is used to control the flow of fluid through the device 100.

FIG. 4
